Overview

The Centers for Medicare & Medicaid Services (CMS) requires all contracted medical Providers and staff receive basic training about the Special Needs Plans (SNPs) Model of Care. The SNPs Model of Care is the plan for delivering coordinated care and care management to special needs Members. SNPs are responsible for conducting their own MOC training, which means you may be asked to complete multiple trainings by different health plans. CMS requires us to show evidence of the availability of MOC training materials communicated to Providers.

What is Model of Care training?

According to CMS: “The MOC provides the basic framework under which the SNP will meet the needs of each of its enrollees. The MOC is a vital quality improvement tool and integral component for ensuring that the unique needs of each enrollee are identified by the SNP and addressed through the plan's care management practices”.

This training will identify how you, as a Provider of care, will support the Special Needs Plan Model of Care, while understanding CMS requirements for managing those Members.

In order to ensure Molina Healthcare remains compliant with CMS Regulatory Requirements for Model of Care training, receipt of your completed Attestation Form is due to Molina Healthcare by the date listed on your Attestation Form.
